# “Explore Courses Now”

**Welcome to BAOIAM Technology Development with AI and Coding Course!**  
**Unlock Your Potential with Our Technology Development with AI and Coding Course**

Introducing the course focused on Technology Development with AI and Coding to the students. It is crucial for a person in contemporary society with the abundance of various technological advancements to know and even more to possess the skills in artificial intelligence and coding basics. In this relation, the goals of this course include an understanding of skills and knowledge that will be effective as the student embarks on a future career in technology. Obtain general knowledge about the field of artificial intelligence like machine learning, neural networks, and data processing.

# PROGRAM OVERVIEW

- Become armored with contemporary information in AI and coding, which prepares you for future technologies. Discover the basic knowledge one must acquire to take up different popular occupations in the sphere of IT.
- Dive into this course and learn the basics of Artificial Intelligence, coding languages, and programming.
- Earn the foundational knowledge of artificial intelligence, such as machine learning, neural networks, and data processing. Research how the implementation of AI in several domains affects individuals.
- Learn programming languages like Python, Java, and programming C++. Solve problems generically by use of coded exercises or projects.

## Placement Assistance

We offer placement support by training you for **interviews** and guiding you to take up the **right career path**.
